SUMMARY

Enthusiastic and driven Software Engineering student at UTM (CGPA: 3.96), seeking a Frontend Developer/ Full Stack Developer/ Software Engineer position upon graduation. Skilled in React, Flutter, Node.js, Agile and Waterfall methodologies. Passionate about building scalable and user-friendly web and mobile applications.

EDUCATION

Universiti Teknologi Malaysia

Oct 2022 – Jul 2026

- Bachelor of Computer Science (Software Engineering) with Honors
- CGPA: 3.96 / 4.00
- Relevant Coursework: Web Development, Mobile App Development, Data Structure Algorithm, Database System, Artificial Intelligence

Kolej Matrikulasi Labuan

Jul 2021- May 2022

- Physical Science (Mathematics, Physics, Chemistry, Computer Science)
- CGPA: 4.00 / 4.00
- MUET: Band 4

WORKING EXPERIENCE

Intern (Sarawak Energy Berhad)

Sep 2025 – Feb 2026

- Supported enterprise procurement systems within the Procurement Digitalization and Innovation Unit
- Enhanced UI/UX for internal systems and carried out internal testing to ensure functionality and usability
- Provided helpdesk support, troubleshooting and resolving user issues on procurement platforms
- Applied academic knowledge to real-world digital transformation initiatives in procurement operations

Tech: OutSystems, SAP Ariba API, Freshdesk API

PROJECTS

TrustGuard

Mar 2026 – Apr 2026

- Developed a secure digital transaction platform to improve transparency and efficiency in financial transactions.
- Designed and implemented transaction tracking, validation, and history management features.

Tech: React, Fast API, MongoDB, SMOTE, XGBoost

Github: [TrustGuard](#)

Pitching Video: [TrustGuard_VarsityHackathon2026](#)

SAgile Development Tools

Oct 2024 – Jan 2025

- Contributed to a web-based agile project management platform for user stories, tasks, and NFR tracking.
 - Implemented collaboration features including NFR management, task commenting, and automated email notifications.
- Successfully deployed the platform for use by UTM students in real-world academic software projects.

Tech: Laravel, MySQL, Gmail API

TVPSS Management System

Oct 2024 – Jan 2025

- Developed the User Management and Activity Management modules, improving user access control, activity tracking, and feedback collection
- Built with Spring MVC and MySQL for scalable management of the TV Pusat Sumber Sekolah (TVPSS) program across multiple schools

Tech: Spring MVC, Spring Boot, MySQL

Github: [TVPSSHUB](#)

UTM Robocon Team External Website

Aug 2023 – Aug 2024

- Developed, deployed, and maintained the official website for UTM's Robocon Team from scratch
- Built a fully functional platform providing information, updates, and engagement opportunities for students, sponsors, and robotics enthusiasts

Tech: React, Node.js, Next.js

ACHIEVEMENTS

UTM Robocon Team Management System — Digitex, Bronze Award

Mar 2026 – Jul 2026

- Developed a centralized web-based management system to digitalize UTM Robocon Team operations.
- Implemented 11 integrated management modules with role-based access control (RBAC).
- Built an AI-powered Face Attendance system for automated attendance verification.

Tech: React, Laravel, OCR, Face Attendance AI, Gmail API

Live: app.utmrobocon.com

Ka-Ching — Start Up Competition, Consolation Award

Mar 2025 – Jun 2025

- Built a cross-platform expense-splitting app enabling groups to record shared expenses and automatically calculate what each member owes, across different countries/currencies
- Integrated Smart OCR to streamline receipt capture and expense entry

Tech: Flutter, Firebase, Smart OCR

Github: [Ka-Ching](#)

Pitching Slide: [Ka-Ching_StartUp2025](#)

TrustChain — Varsity Hackathon, Top 10 Teams (Fintech & Blockchain)

Mar 2025 – Apr 2025

- Built a full-stack blockchain application for transparent, secure peer-to-peer charitable donations within a 19-day sprint
- Implemented an immutable ledger and smart contract-based milestone fund disbursement using Solidity on Ethereum

Tech: React, Laravel, Gemini AI, MySQL, Web3.js, Hardhat, Solidity, Ethereum Smart Contract

Github: [Trustchain](#)

Pitching Video: [TrustChain_VarsityHackathon2025](#)

FoodFul — HCI Day, Champion & Fusion, Bronze Award

Jan 2024 – Sep 2024

- Designed a Figma prototype addressing SDG 2: Zero Hunger by connecting restaurants with gardeners, low-income individuals, and pet owners to reduce food waste.
- Extended the project into Fusion 2024 with an enhanced poster and extended abstract, earning the Bronze Award.
- Demonstrated strong UI/UX design, research, analytical, and presentation skills.

Tech: Figma

Pitching Video: [FoodFul Fusion 2024](#)

Durian — Hack@10, Top 15 Teams

Nov 2023 – Dec 2023

- Built an application using YOLOv5 object detection to analyze durian quality and condition
- Developed the frontend in React and backend in Node.js, integrating computer vision for accurate, user-friendly evaluation

Tech: YOLOv5, React, Node.js

Pitching Video: [Durian Hack@10 2023](#)

Ecojaya — Young Maker Challenge, State Champion

Mar 2019 – Jun 2019

- Developed a smart pest control and watering system using Arduino Uno with automated soil-moisture-based irrigation
- Implemented a PIR motion sensor to trigger a deterrent buzzer, combining automation and IoT for agricultural efficiency

Tech: Arduino

SKILLS

Programming Language: C++, C, Java, Python

Frontend Development: HTML, CSS, JavaScript, React, Flutter, OutSystems

Backend Development: PHP, Laravel, Node.js, Spring MVC, Fast API, OutSystems

Design Tools: Figma

Databases: MySQL, Oracle, MongoDB

EXTRACURRICULAR ACTIVITIES

Vibeathon — Head of Activity Unit

Jul 2026

- Led the Activity Unit in planning and executing event operations for Vibeathon.
- Managed event schedules and operational workflows, ensuring timely execution of activities.

Symposium Johor TVPSS Mangement Information System — Committee

Jul 2024

- Prepared certificates for all participants and winners, ensuring accurate and timely distribution

Friendly Match — Organizer

Jun 2024

- Organized a whole-day friendly match involving 6 teams from 8 universities, managing scheduling, coordination, and task delegation

International Youth Robot Competition — Co-Organizer

Jun 2023

- Recruited volunteers and coordinated dinner arrangements and event logistics, contributing to smooth competition execution
